## Proud to Introduce **bioheat** to Your Home!

Reilly & Sons Inc. are very excited to be a part of this new era in home heating oil. We now will be filling your home tanks with **bioheat**. This revolutionary product will act the same as the old product our company had been using. The benefits of **bioheat** are sure to impact our environment as well as the health of you and your family. We are very anxious to introduce **bioheat** into your home and hope to answer some of the questions you may have about our new product.

### What is **bioheat**?

**Bioheat** is a heating oil blend that contains biodiesel, which is a renewable fuel. This new fuel consists of heating oil mixed with biodiesel fuel to create **Bioheat**. Biodiesel is derived from pure soybean oil. In the days of rising gas prices, a renewable source of fuel is something that is sure to benefit us in the years to come. **Bioheat** helps heating oil burn cleaner, making it better for the environment and your home heating system. We at Reilly & Sons Inc. will be using a 3% blend of pure biodiesel with 97% conventional home heating oil.

### What are the benefits of **bioheat**?

- **Bioheat** will help heating oil burn cleaner within your home boiler or furnace. This is better for the environment and can also help to maintain cleaner heat exchangers. This can help extend the life of your home heating system.
- Biodiesel is a natural, renewable resource.
- In pure form biodiesel is non-toxic and is also biodegradable.
- Biodiesel use is widespread across our nation. All four branches of the U.S. military, dozens of school districts and the Nation Park Service are all consumers of biodiesel.
- **Bioheat** will be delivered to your home in the same manner you are accustomed to. You do nothing but reap the benefits!
- **Bioheat** requires absolutely no adjustments to your current home heating system.

### Is your home oil storage compatible with **bioheat**?

Oil tanks and systems are compatible with **bioheat** at blends of 20 percent or less. We will be using a 3 percent blend that should have no adverse effect on your mechanical systems. **Bioheat** has a tendency to dissolve or loosen some sediment that has rested in your tank from years of conventional heating oil use. This is just one more wonderful benefit for you and your home.

**Bioheat** is not a replacement for heating oil. **Bioheat** is a product that makes today's heating oil better and we are very excited to offer this new product to you. We are more than happy to answer any other questions you may have about **bioheat**. You may call the office during our regular office hours or visit [www.biodiesel.org](http://www.biodiesel.org) for any further information you may want to know about biodiesel and **bioheat**.
